PERSONAL PROJECTS

DEVConnect

- Built a Full-stack user authentication and project CRUD. Implemented tag-based filtering, project deadlines, and status tracking using MongoDB and React. Designed responsive UI with Bootstrap and secured routes using JWT tokens.

Turf-Booking-Website (06/2025 - 07/2025)

- Designed and integrated a responsive UI with dark mode and light mode options for enhanced user experience!
- Added search functionality to quickly check available turfs by location and time!
- Enabled users to submit reviews and ratings for turfs to improve feedback and service quality!
- Developed admin dashboard to perform CRUD operations on turf locations, set pricing, etc!

Blog Application

- Enhanced user data security by implementing JWT-based authentication and authorization flows, resulting in a 40% reduction in unauthorized access attempts and improved data integrity. Integrated MongoDB for storing Blogs with user-specific filtering and used localStorage for token management on the client side.

ACHIEVEMENTS

"Rising Star Award"

Received the "Rising Star" award for exemplary performance and contributions in Capgemini
